Currency risk

Your Investment is made in South African rand and you are not exposed to any movements (positive or negative) of foreign currencies over the Investment term. This Investment does not use any of your individual foreign exchange allowance.

Capital protection on maturity

Provided you hold your Investment for the full term of each leg of the Investment (half for three years and half for five years), your South African rand Investment Amount will be repaid in full, irrespective of the performance of the Index.

Other important information

Valuations and early redemptions

During the term of the Investment you will be entitled to make one withdrawal from the policy. You cannot make more than one withdrawal during the term of the Investment.

Please note that on the maturity of the Fixed Return Investment, you may access the full proceeds of this leg. Your financial adviser will provide you with suitable reinvestment options based on the availability of investment products at the time.

If you access the full proceeds of the Fixed Return Investment on maturity, no further withdrawals will be allowed and the Investment will continue until the Equity Index Investment Maturity Date.

Please note that any withdrawals will be done at the prevailing market value of the Investment and any such early withdrawal could result in you losing some or all of your Investment Amount.

Further, note that all investment proceeds due to you will be paid out within approximately seven (7) business days after the Maturity Date.

Cooling-off Period

You have a 37 (thirty seven) calendar day cooling-off period (the "Cooling-off Period") from the Investment Start Date in which to change your mind about your Investment. If you change your mind within this period, we will sell the instruments at market value and pay you this plus any fees that have been included in the cost of the Investment. This value may be lower than your initial Investment Amount.

If you surrender your Investment after the Cooling-off Period, we will sell the instruments and pay you the current market value. This will be seen as an Early Redemption – see section above.
