Currency risk

The Index is quoted in USD. Your Investment is in ZAR and any positive Index Performance is exposed to the ZAR/USD exchange rate over the Investment term. This Investment does not utilise any of your individual foreign exchange allowances.

Capital protection on maturity

Provided you hold your Investment for the full term of each leg of the Investment (half for three years and half for five years), your South African rand Investment Amount will be repaid in full, irrespective of the performance of the Index.

The Index

The Index to which the Investment is linked is the Credit Suisse Global Equity Multi-Factor 10% Risk Control (ER) Index (the 'Index'). The Index facts sheet can be found on our [website](#) or ask your financial adviser to provide you with a copy.

Index Performance Calculation

Initial Index Level (i)

The level of the Index on the Investment Start Date at the Valuation Time as determined by the Calculation Agent.

Index Performance (IP)

$$IP = (f-i)/i$$

Valuation Time
