### About the Investment

**Investment type:** Linked long-term insurance policy ("Policy")

**Minimum Investment Amount:** R 250 000 (two hundred and fifty thousand South African rand)

**Investment term:** Five (5) years

**Currency:** South African rand (ZAR)

#### Investment objective(s)

##### On maturity, you will receive:

- (i) your full Investment Amount back, subject to the Investment Amount Protection provisions below; plus
- (ii) any accrued Enhanced Returns (as accrued each year subject to the Index performance).

#### Investment Amount Protection

The level of capital protection provided on maturity depends upon the performance of the Index.

On maturity, if the closing level of the Index is equal or greater than the Barrier Level, investors will receive 100% of the Investment Amount back, plus any Enhanced Returns locked in.

However, if on maturity the closing level of the worst-performing Index is below the Barrier Level, the Investment Amount to be repaid will be reduced by the percentage amount by which the Final Index Level is lower than the Initial Index Level. If this percentage loss exceeds the sum of any locked-in Enhanced Returns, then investors will suffer a capital loss.

#### Enhanced Return

On each annual observation date, investors have the potential to lock in an Enhanced Return, the sum of these to be paid at maturity. The Enhanced Return is locked in each year if the closing level of the worst-performing Index

on the relevant annual observation date is at or above the Barrier Level. The Enhanced Return will be at least 12% and if it is below that, Absa will not go ahead and monies will be returned to investors.

#### Barrier Level

60% of the Initial Index Level

#### Initial Index Level

The closing level of the Index on the Investment Start Date at the Valuation Time as determined by the Calculation Agent.

#### Final Index Level

The closing level of the Index on the Maturity Date at the Valuation Time as determined by the Calculation Agent.

#### Valuation Time

The time at which the official closing level of an index is calculated and published.

#### The Indices

The Investment is linked to the performance of the following indices: S&P 500 Index (SPX) Nikkei-225 Index (NKY) Hang Seng China Enterprise Index (HSCEI)

#### Currency risk

Your Investment is in ZAR. Investors are not exposed to the exchange rate risk over the Investment term and will not be affected by any appreciation or depreciation in the currency in so far as this Investment is concerned. This Investment does not use any of your individual foreign exchange allowances.
