(k) Particulars regarding the Index:	<p>Index Description</p> <p>The MSCI EMU Select Profitability Leaders Decrement 5% Index aims to represent the performance of the MSCI EMU Select Profitability Leaders Index, while applying a constant markdown (synthetic 5% dividend). The Index objective is to invest in securities which display sustainable and persistent profitability characteristics. The index is constructed by initially selecting the largest 50 securities based on market capitalisation from the MSCI EMU Index, a broader parent index which consists of over 250 securities within the European Economic and Monetary Union. From this universe of 50 securities, the Index selects the 40 securities with the highest ESG (Environmental, Social and Governance) Governance Score to generate a universe of stocks that conform to the principles set out by</p>

the MSCI ESG methodology. A final weighting scheme is applied that ranks securities, from highest to lowest, based on their Return on Assets (ROA) metric to form the final index constituents. ROA is a financial indicator of a company's profitability and companies with a higher ROA value tend to have stronger profitability and perform better over time. The Index is reviewed on a quarterly basis, coinciding with the May and November Semi-Annual Index Reviews and the February and August Quarterly Index Reviews of the Parent Index.

Index Construction

The Index is constructed from the MSCI EMU Index. The following steps are applied in the construction of the MSCI EMU Select Profitability Leaders Index.

- Applicable Universe
- ESG Governance Score Screen
- Security Selection
- Weighting Scheme

After the above steps, the following additional step is applied to construct the MSCI EMU Select Profitability Leaders Decrement 5% Index

- Applying the MSCI Decrement Indexes Methodology

Applicable Universe

The applicable universe for MSCI EMU Select Profitability Leaders Index is constructed by selecting top 50 securities from the MSCI EMU Index based on their free float market capitalization.

ESG Governance Score Screen

The index uses the MSCI ESG Governance Score to exclude the bottom 5 stocks from the applicable universe, as ranked based on their ESG Governance Score. In case of two or more securities having the same governance score the security with the higher weight in the MSCI EMU Index is given higher rank.

ESG Governance Score Definition

This is an absolute 0-10 corporate governance score. (Score: 0-10) This key issue evaluates the extent to which companies' corporate governance practices in specific governance areas – audit, board,

compensation/remuneration, shareholder rights -- pose financial risks to shareholders.

Security Selection

After applying ESG Governance Score screen, the top 40 securities with the highest rank based on the ROA ranking scheme are included in the final index.

ROA=Earnings/Total Assets

Earnings are most recently reported company net earnings, Total Assets is the most recently reported company total assets.

ROA Ranking Scheme

The top 40 securities are selected based on Final Rank, where: Final Rank = Avg (Rank₁, Rank₂)

In case of two or more securities having the same value of Final Rank the security with higher Rank₁ is given higher Final Rank.

- Definition of Rank₁: Ranking of each security in descending order of latest available ROA. In case of two or more securities having the same latest available ROA the security with the higher weight in the MSCI EMU Index is given higher Rank₁.

- Definition of Rank₂: Ranking of each security in descending order of the average of the differences between latest available ROA and past 3-, 6- and 9-year ROA. In case of two or more securities having the same value for average of the differences between latest available ROA and past 3-,6- and 9-year ROA the security with the higher weight in the MSCI EMU Index is given higher Rank₂. If the value of ROA for any security is missing, then the index fills it with zero for that security.

Security Weighting

The above selected 40 securities are classified into four buckets derived from their final ranks. Securities belonging to the same bucket are allocated equal weights. Securities in each bucket are assigned weights according to the table below:

Bucket	Security Rank Range	Security Weighting in Bucket
1	1-10	5.00%
2	11-20	3.00%

3	21-30	1.50%
4	31-40	0.50%

Maintaining the Indexes

Quarterly Index Reviews

The MSCI EMU Select Profitability Leaders Index is reviewed on a quarterly basis, coinciding with the May and November Semi-Annual Index Reviews and the February and August Quarterly Index Reviews of the MSCI EMU Index. The pro forma Index is typically announced nine business days before the effective date.

Ongoing Event Related Changes

The general treatment of corporate events in the MSCI EMU Select Profitability Leaders Index aims to minimize turnover outside of Index Reviews. The methodology aims

		<p>to appropriately represent an investor's participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur as a result of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent. Additionally, if the frequency of Index Reviews in the MSCI EMU Index is greater than the frequency of Index Reviews in the Index, the changes made to the MSCI EMU Index during intermediate Index Reviews will be neutralized in the Index.</p> <p>The Index Sponsor has provided the Issuer authority to use the index. The Issuer and MSCI entered into a license agreement whereby the Issuer is permitted to use MSCI Indices, including the use of this Index. The Issuer and MSCI are not affiliated entities. Written permission from MSCI is required before using any MSCI trademark, trade name or service mark to promote or market any MSCI securities.</p> <p>Any changes to the index methodology will be published on SENS and communicated to the JSE.
