The Index Calculation Agent, in consultation with the Index Committee, nonetheless, will have the discretion to make appropriate adjustments in good faith and in order to achieve a commercially reasonable outcome and (where there is a corresponding applicable regulatory obligation) shall take into account whether fair treatment is achieved by any such adjustment in accordance with its applicable regulatory obligations, in any particular situation, in light of the facts and circumstances of such situation. - d) The Index Sponsor determines that an Index Component Disruption Event has occurred.

Index Risk Disclosures

INDEX DESCRIPTION LIMITATIONS

The performance of the Index is dependent on a pre-defined rules-based methodology. There is no assurance that other methodologies would not result in better performance than the methodology followed in respect of the Index.

UNDERPERFORMANCE RISK

The Index provides exposure to notional long positions in Credit Suisse Indices. The Index is constructed under the assumption that the Credit Suisse Indices will outperform the Benchmark Indices over the long term. It is a risk that these Credit Suisse Indices will not outperform the Benchmark Indices.

EFFECT OF INDEX FEES AND ADJUSTMENT FACTOR

The Index Level includes a deduction of a notional Index Fee and an Adjustment Factor. The Index Fee and the Adjustment Factor will ultimately serve to act as a drag on the Index Level and will reduce the return available (if any) under the Notes.

VOLATILITY TARGET

The exposure of the Index to the Core Index is adjusted, on a daily basis, in accordance with a formula which seeks to maintain an overall specified annualised volatility level for the Index Level of 10% (the "Volatility Target"). The exposure is determined by reference to the recent volatility of the Core Index. Although the volatility of the Core Index and the exposure of the Index thereto are determined and adjusted daily, the actual volatility of the Index may be greater or less than the Volatility Target. As the Volatility Target is assessed daily, this can lead to a daily change in the exposure of the Index to the Core Index. Another frequency for determining this may have different results. The application of the Volatility Target is based on the historical exponential volatility of the Core Index. This means there may be a significant period of time before the Index reduces

exposure to account for any increase in volatility. This could result in a lower level of the Index than would prevail if the exposure had been adjusted more quickly. The exposure of the Index to the Core Index is designed not to exceed 150% and, therefore, leverage may be applied to the Index, which will have a magnifying effect on the performance of the Index (whether positive or negative). During periods when the realised volatility of the Core Index is higher than the Volatility Target, particularly in bull markets, the volatility targeting mechanism may lead the Index to underperform relative to the Core Index and/or compared with indices that do not use such a mechanism. There can be no assurance that the volatility targeting mechanism used to construct the Index will be successful or that the Index will outperform the strategy or any alternative volatility adjusted index that might be constructed by reference to the Core Index.

CONCENTRATION RISK

The Index Constituents and therefore the Index is composed of stocks only. Therefore, the Index may be less diversified than an investment in any fund, investment portfolio or other product which invests in or tracks a diversified investment portfolio with exposure to multiple asset classes, and therefore could experience greater volatility.

FIXED ALGORITHMIC MODEL PARAMETERS

In common with all algorithmic strategies, the Index uses a rules-based methodology which contains fixed parameters. The Index methodology assumes that these parameters and other fixed parameters are reasonable in the context of the Index. However, alternative parameters could have a positive effect on the performance of the Index.

LIMITED OPERATING HISTORY

The Index was launched by the Index Sponsor on a specified Index Launch Date and has been calculated by the Index Calculation Agent for the period from that Index Start Date. The Index Sponsor has published limited information about how the Index would have performed had it been calculated prior to the Index Launch Date. Due to the fact that the Index and its constituents was each created relatively recently, and limited historical performance data exist with respect to it, an investment in a product linked to the Index may involve a greater risk than an investment in a financial product linked to one or more indices with a more

	<p>established record of performance. Furthermore, any back - testing or similar performance analysis performed by any person in respect of the Index must be considered illustrative only and may be based on estimates or assumptions not used by the Index Calculation Agent when determining the Index Level.</p> <p>The Index Sponsor has provided the Issuer authority to use the index. Any changes to the index methodology will be published on SENS and communicated to the JSE. Index constituents can be requested from the Issuer at aiss@absa.co.za.</p>

(A) "FX Disruption" means the occurrence of any event after the Trade Date that makes it unable for the Issuer or an affiliate of the Issuer (with whom the Issuer has hedged its liabilities in respect of these Notes), after using commercially reasonable efforts, to:

- (i) transfer, on or in respect of a valuation date, through customary legal channels the proceeds of a hedge position denominated in South African Rand (ZAR) from accounts within the Affected Jurisdiction to (a) accounts outside such Affected Jurisdiction, (b) other accounts within such Affected Jurisdiction or (c) the accounts of a non-resident of such Affected Jurisdiction;

- (iii) convert the proceeds of a hedge position denominated in the Local Currency into South African Rand (ZAR) on or in respect of a valuation date through customary legal channels;
- (iv) convert the proceeds of a hedge position denominated in the Local Currency into South African Rand (ZAR) on or in respect of a valuation date at a rate at least as favourable as the rate for domestic institutions located in the Affected Jurisdiction; or
- (v) obtain a rate or a commercially reasonable rate (as determined by the Issuer), in each case, at which the proceeds of a hedge

position denominated in the Local Currency can be exchanged for South African Rand (ZAR) on or in respect of a valuation date.

(B) The consequences of FX Disruption:

(i) in the case of an FX Disruption that is described in:

(a) sub-paragraphs (A)(i) or (A)(ii) of the definition of "FX Disruption", the payment obligations of the Issuer under the Notes will be postponed until the date falling 5 (five) Currency Business Days after the date on which the FX Disruption ceases to exist or, if that would not be commercially reasonable, as soon as commercially reasonable thereafter; and

(b) sub-paragraph (A)(iii) of the definition of "FX Disruption":

(1) the conversion of proceeds of the hedge position denominated in the Local Currency into South African Rand (ZAR) will be postponed until the first Currency Business Day on which such FX Disruption ceases to exist or, if that would not be commercially reasonable, as soon as commercially reasonable thereafter (the "Conversion Date"); and

(2) the payment obligations of the Issuer under the Notes will be postponed until the date falling 5 (five) Currency Business Days after the Conversion Date or, if that would not be commercially reasonable, as

soon as commercially reasonable thereafter,

provided that in each case as set out in sub-paragraphs (B)(i)(a) and (B)(i)(b) above, the Issuer will adjust the payment obligations in respect of the Notes to account for any interest actually received and funding (including internal funding costs) or other charges actually incurred by the Issuer or its affiliate that acted as Hedging Party as a result of or otherwise during such postponement; and

- (ii) in the case of an FX Disruption that is described in sub-paragraphs (A)(iv) or (A)(v) of the definition of "FX Disruption", the Issuer may determine the FX Rate as soon as reasonably practicable after taking into consideration all available information that it deems relevant, including any published official or industry-consensus rate of exchange; provided, however, that in anticipation of the cessation of the FX Disruption, the Issuer may postpone the determination of the FX Rate to such time as is reasonable and it will adjust the payment obligations in respect of the Notes to account for any interest actually received and funding (including internal funding costs) or other charges actually incurred by the Issuer or an affiliate of the Issuer that acted as Hedging Party as a result of or otherwise during such postponement.

Notwithstanding any postponement of the obligations of the Issuer under the Notes, in respect of an FX Disruption, the Issuer may redeem the Note early and the Issuer will calculate the Early Redemption Amount to be paid to the Noteholder, in accordance with Condition 8.5 of the Terms and Conditions of the Notes.

	(C) If the start of the FX Disruption coincides with a Disrupted Day, the above provisions will only take effect after such postponements or adjustments have been made as a result of such Disrupted Day and the Issuer's obligation to make any payment will continue to be postponed in accordance with the above provisions.
